TABLE OF CONTENTS

1. Graphene in printable, flexible and stretchable electronic devices and sensors that will revolutionalize consumer electronics and health (Page 4)
   - The wearables revolution
   - Nanomaterials
   - Graphene
   - Conductive inks
   - Medical and healthcare wearables and sensors
   - Flexible batteries

2. Graphene in construction (Pg. 11)
   - Cement.
   - Steel coatings.
   - Companies.

3. Graphene in lighting (Pg. 14)
   - Organic light emitting diodes (OLEDs).
   - Graphene LED light bulbs.
   - Deep ultraviolet light (UV light) LEDs
   - Companies.

4. Graphene in Australia (Pg. 18)
   - Graphene companies in Australia.
   - Research.

5. Graphene anti-corrosion coatings (Pg. 22)
   - Market drivers.
   - Green anti-corrosion coatings.
   - Nanocoatings.
   - Graphene.
   - The oil and gas market.
   - The marine market.
   - Companies.

6. Graphene pricing (Pg. 28)
   - Why the distinctions between different grades of graphene are important.
   - Prospects for new processes to make high quality graphene.
   - Selling prices for the different recognized variants of graphene. The price per unit mass of different materials referred to as graphene ranges over an amazing 9 orders of magnitude, for a billion dollars per kilogram equivalent of monolayer material (though of course the amount of this material is very small) to a few dollars per kilogram for exfoliated graphite.
   - Processes for producing large quantities of the highest grade materials, namely monolayer and/or few-layer graphene, at a modest cost.

7. Graphene batteries (Pg. 34)
• Flexibility.
• Graphene in lithium-ion batteries (LIB).
• Graphene in lithium-air batteries.
• Sodium-ion batteries.
• Supercapacitors.
• Product developers.

8. Self-healing capabilities coatings, polymers and polymer composites (Pg. 40)

• What are self-healing materials?
• Extrinsic self-healing.
• Intrinsic self-healing.
• Healing volume.
• Self-healing coatings.
• Self-healing polymer composites.
• Self-healing metals.
• Metal matrix composites.
• Self-healing ceramics.
• Self-healing nanomaterials.
• Self-healing biomaterials.
• 3D printing of self-healing materials.
• Self-healing single-walled carbon nanotubes.
• Graphene self-healing materials.
• Shape memory composites.
• Markets for self-healing materials and coatings.
• Companies profiles.

9. Nanotechnology in medical wearables (Pg. 48)

• Medical wearables.
• Nanomaterials.
• Patch-type skin sensors.
• Hydration sensors.
• Wearable sweat sensors.
• Smart footwear.
• Companies.

10. Nanocomposites (P. 58)

• Markets for nanocomposites.
• Aerospace.
• Automotive.
• Packaging.
• Nanoclays.
• Nanocellulose.
• Sporting goods.
• Companies.

11. Nanotechnology in smart textiles (Pg. 64)

• Types of smart textiles.
• Smart textile products.
• Conductive inks.
• Industrial monitoring.
• Military.
• Energy harvesting textiles.

12. Nanocellulose in Japan (Pg. 72)

• NanoFibrillar Cellulose (NFC).
• NanoCrystalline Cellulose (NCC).
• Nanocellulose producers in Japan.

13. Conductive nano inks (Pg. 78)

• Graphene conductive inks.
• Printable sensors.
• Printed batteries.
• Printable antennas.

14. The market for Ta-C coatings (Pg. 82)

• Main hard ta-C coating material properties.
• Comparison with graphene.
• ta-C for larger applications.
• Recent progress in carbon fundamentals.
• ta-C future markets.

15. Waterproofing electronics (Pg. 90)

• Nanocoatings for waterproofing electronics.
• Main hydrophobic, superhydrophobic nanocoatings product developers in waterproofing electronics and coatings techniques.

16. Graphene quantum dots (Pg. 94)

• Properties.
• Synthesis.
• Applications.
• Advantages.
• Recent commercial activity.

17. The market for single wall carbon nanotubes (Pg. 100)

• Applications.
• Electronics.
• Companies.

18. Nanotechnology in the smart textiles and wearables market (Pg. 106)

• Market growth.
• From rigid to flexible and stretchable.
• Smart textiles.
• Product developers.
19. Nanotech investments, deals and funding January 2017-December 2017 (Pg. 112)

20. Nanotech government, regulation & policy news January 2017-December 2017 (Pg. 136)

21. Nanotech business and product news January 2017-December 2017 (Pg. 150)

22. Graphene business and product news January 2017-December 2017 (Pg. 180)

23. Nanocoatings business and product news January 2017-December 2017 (Pg. 234)

24. Other nanotech business and product news January 2017-December 2017 (Pg. 244)
