

Table of contents

| | | |
|----------|---|-----------|
| 1 | Executive summary | 13 |
| 1.1 | Current market for batteries | 15 |
| 1.2 | Batteries market trends | 16 |
| 1.2.1 | Smaller, flexible, lightweight and increased power | 16 |
| 1.2.2 | Advanced batteries for new products | 17 |
| 1.2.3 | Li-ion batteries market | 17 |
| 1.2.3.1 | All-electric and hybrid vehicles | 19 |
| 1.2.4 | Solid-state batteries | 19 |
| 1.2.5 | Competition with conventional batteries | 20 |
| 1.3 | Current flexible, stretchable, printed and thin film batteries market | 21 |
| 1.3.1 | Device constraint due to battery size | 21 |
| 1.3.2 | Foldable smartphones | 21 |
| 1.4 | Future market directions | 23 |
| 1.5 | Market drivers | 24 |
| 1.5.1 | Growth of Internet of Things (IoT) | 24 |
| 1.5.2 | Size constraints of current battery technology | 24 |
| 1.5.3 | Inadequacies of current battery technology for wearables | 24 |
| 1.5.4 | Energy harvesting | 25 |
| 1.5.5 | Power sources for flexible electronics | 25 |
| 1.5.6 | Healthcare market | 26 |
| 1.6 | Market challenges | 28 |
| 1.7 | Roadmap for battery development | 29 |
| 1.8 | Electronics multi-nationals product development activities in flexible, stretchable, printed and thin film batteries | 30 |
| 1.9 | Supercapacitors market | 31 |
| 1.10 | Energy harvesting devices | 32 |
| 1.11 | Impact of enabling technologies such as genomics, artificial intelligence, virtual and augmented reality for wearables applications | 33 |
| 1.12 | Use of nanomaterials and other advanced materials | 35 |
| 1.13 | The global market for thin film, printed, flexible & stretchable, batteries | 36 |
| 1.13.1 | Addressable market by application areas | 36 |
| 1.13.2 | Global market to 2030, by units sales, revenues and applications | 37 |
| 1.13.3 | Regional markets | 41 |
| 1.13.3.1 | Asia-Pacific | 42 |
| 1.13.3.2 | North America | 43 |
| 1.13.3.3 | Europe | 44 |
| 2 | Research methodology | 46 |
| 3 | Thin film batteries | 48 |
| 3.1 | Current market status | 48 |
| 3.2 | Flexibility | 50 |
| 3.3 | Advantages and disadvantages | 51 |
| 3.4 | Types of solid-state lithium-based batteries | 52 |
| 3.5 | Materials | 52 |

| | | |
|----------|---|-----------|
| 3.5.1 | Cathodes..... | 53 |
| 3.5.2 | Anodes..... | 54 |
| 3.6 | Chip-type ceramic secondary batteries | 54 |
| 3.7 | Nanomaterials..... | 56 |
| 3.7.1 | Light-weight, large-area, flexible conductive CNT films for electrodes..... | 56 |
| 3.7.2 | Metal-organic frameworks | 57 |
| 3.8 | Commercial application of thin film batteries | 57 |
| 3.9 | Market challenges..... | 58 |
| 3.10 | Ultrathin rechargeable lithium polymer batteries | 59 |
| 3.11 | Thin film batteries in wearables | 60 |
| 3.12 | Thin film battery companies | 62 |
| 4 | Printed batteries..... | 64 |
| 4.1 | Current market status | 64 |
| 4.2 | Types of printed batteries | 65 |
| 4.3 | Advantages and disadvantages..... | 68 |
| 4.4 | Capacities | 68 |
| 4.5 | Fabrication | 69 |
| 4.5.1 | Green printing | 70 |
| 4.6 | Types of printed batteries | 70 |
| 4.6.1 | Printed microbatteries..... | 70 |
| 4.6.2 | Printed primary batteries..... | 71 |
| 4.6.3 | Printed rechargeable batteries..... | 72 |
| 4.6.3.1 | Flexible, stretchable and rechargeable printed batteries..... | 72 |
| 4.6.4 | 3-D printed batteries | 73 |
| 4.6.5 | Graphene batteries | 74 |
| 4.7 | Commercial printed battery products | 74 |
| 4.7.1 | Electronic devices | 75 |
| 4.7.2 | Health-monitoring devices | 75 |
| 4.8 | Printed battery companies | 76 |
| 4.9 | Market outlook | 77 |
| 5 | Flexible and stretchable batteries..... | 77 |
| 5.1 | Current market status | 78 |
| 5.2 | Growth in flexible electronics | 80 |
| 5.3 | Recent smartphone products..... | 80 |
| 5.4 | Materials design..... | 81 |
| 5.4.1 | Electrolytes | 83 |
| 5.4.2 | Electrodes | 83 |
| 5.5 | Flexible lithium-ion batteries (LIBs)..... | 84 |
| 5.5.1 | Textile/fiber-based LIBs | 85 |
| 5.6 | Flexible lithium–sulfur (Li–S) batteries | 86 |
| 5.7 | Flexible lithium–air (Li–air) batteries | 86 |
| 5.8 | Flexible zinc–air batteries | 87 |
| 5.9 | Flexible sodium–ion batteries | 88 |
| 5.10 | Carbon nanomaterial flexible batteries | 88 |
| 5.11 | Fiber-shaped Lithium-Ion batteries | 90 |
| 5.12 | Cable-type batteries..... | 90 |

| | | |
|----------|---|------------|
| 5.13 | Bendable microbatteries | 90 |
| 5.14 | Paper batteries..... | 91 |
| 5.15 | Stretchable batteries..... | 92 |
| 5.15.1 | Stretchable conductors and electrodes | 92 |
| 5.15.2 | Stretchable LIBs..... | 92 |
| 5.15.3 | Stretchable Zn-based batteries..... | 93 |
| 5.15.4 | Origami structures..... | 94 |
| 5.15.5 | Foldable kirigami lithium-ion batteries | 95 |
| 5.15.6 | Island-Bridge Structures | 95 |
| 5.15.7 | Arched electrode architecture..... | 96 |
| 5.15.8 | Stretchable nanogenerators | 97 |
| 5.15.9 | Batteries in stretchable fabrics..... | 97 |
| 5.16 | Carbon nanomaterials for flexible and stretchable batteries | 99 |
| 5.16.1 | Single-wall carbon nanotube (SWCNT) flexible batteries..... | 99 |
| 5.16.2 | Ultra-transparent and stretchable graphene electrodes | 100 |
| 5.17 | Other nanomaterials for flexible and stretchable batteries | 101 |
| 5.17.1 | Cellulose batteries | 101 |
| 5.17.2 | Nanowire elastic conductors..... | 103 |
| 5.17.3 | 2D nanomaterials beyond graphene..... | 104 |
| 5.18 | Challenges in materials design for flexible batteries | 105 |
| 5.19 | Flexible and stretchable supercapacitors | 106 |
| 5.19.1 | Materials for electrodes | 106 |
| 5.19.2 | Paper-based flexible micro-supercapacitors | 108 |
| 5.19.3 | Graphene flexible supercapacitors | 109 |
| 5.20 | Flexible and stretchable energy harvesting | 110 |
| 5.20.1 | Stretchable piezoelectric energy harvesting..... | 110 |
| 5.20.2 | Stretchable triboelectric energy harvesting | 111 |
| 5.21 | Flexible thermoelectrics (TEs) | 111 |
| 5.22 | Stretchable heaters..... | 112 |
| 5.23 | Company profiles..... | 112 |
| 5.24 | Recent research..... | 114 |
| 6 | APPLICATIONS ANALYSIS..... | 115 |
| 6.1 | Wearable electronics | 115 |
| 6.1.1 | The wearables revolution..... | 116 |
| 6.1.2 | Current trends..... | 118 |
| 6.1.3 | Flexible, thin, and large-area form factors | 118 |
| 6.1.4 | From rigid to flexible and stretchable..... | 119 |
| 6.1.5 | Importance of battery technologies..... | 120 |
| 6.1.6 | Internet of Things (IoT) | 122 |
| 6.1.6.1 | Batteries for IoT | 123 |
| 6.1.6.2 | Batteryless Internet of Things (IoT) devices | 124 |
| 6.1.7 | Future growth..... | 126 |
| 6.1.8 | Smart watches, fitness wristbands and bracelets..... | 127 |
| 6.1.9 | Current batteries | 128 |
| 6.1.10 | Flexible batteries..... | 128 |
| 6.1.11 | Smart shoes..... | 129 |
| 6.1.12 | Electronic apparel and textiles..... | 130 |

| | | |
|----------|---|------------|
| 6.1.12.1 | Conductive yarns | 131 |
| 6.1.13 | Headwear/Smart helmets | 131 |
| 6.1.14 | Eyewear | 132 |
| 6.1.15 | Wearable strain sensors | 132 |
| 6.1.16 | Wearable tactile sensors | 133 |
| 6.1.17 | Industrial monitoring | 133 |
| 6.1.18 | Military | 134 |
| 6.1.19 | Power Exoskeletons | 135 |
| 6.1.20 | Wearable power bank vests | 136 |
| 6.1.21 | Market outlook | 136 |
| 6.2 | RFID sensors/tracking tags | 136 |
| 6.3 | Smart labels and packaging | 138 |
| 6.3.1 | Batteries in smart cards | 139 |
| 6.4 | Healthcare | 140 |
| 6.4.1 | Printable, flexible and stretchable health monitors | 141 |
| 6.4.2 | Wearable sensors for healthcare | 144 |
| 6.4.3 | Skin patches | 145 |
| 6.4.3.1 | Disposable medical patches | 147 |
| 6.4.4 | Cosmetic skin patches/"E-masks" | 148 |
| 7 | COMPANY PROFILES | 151 |
| 7.1 | 24M | 151 |
| 7.2 | 3D Battery | 152 |
| 7.3 | AdaVolt | 153 |
| 7.4 | AMO Greentech | 154 |
| 7.5 | Apple | 154 |
| 7.6 | ARMOR | 155 |
| 7.7 | Alternet Systems, Inc. | 156 |
| 7.8 | BASF AG | 157 |
| 7.9 | Battrion AG | 157 |
| 7.10 | Beltech | 158 |
| 7.11 | Black Diamond Structures | 159 |
| 7.12 | Blue Spark Technologies, Inc. | 160 |
| 7.13 | BrightVolt | 161 |
| 7.14 | C3 Nano, Inc. | 162 |
| 7.15 | Canatu Oy | 163 |
| 7.16 | Cuberg | 164 |
| 7.17 | Cymbet | 164 |
| 7.18 | Drayson Technologies | 165 |
| 7.19 | Eight19 | 166 |
| 7.20 | Elegus Technologies | 167 |
| 7.21 | Enfucell Oy | 168 |
| 7.22 | Epishine AB | 169 |
| 7.23 | Epsilon | 169 |
| 7.24 | Excellatron Solid State LLC | 170 |
