# TABLE OF CONTENTS

1 INTRODUCTION ............................................................................................. 24
   • 1.1 Aims and objectives of the study.......................................................... 24
   • 1.2 Market definition .................................................................................. 24
     o 1.2.1 Properties of nanomaterials........................................................... 25
     o 1.2.2 Categorization .............................................................................. 26

2 RESEARCH METHODOLOGY .................................................................... 27

3 EXECUTIVE SUMMARY ............................................................................. 28
   • 3.1 High performance coatings ................................................................. 28
   • 3.2 Nanocoatings ....................................................................................... 28
   • 3.3 Anti-viral nanoparticles and nanocoatings .......................................... 30
     o 3.3.1 Reusable Personal Protective Equipment (PPE)....................... 32
     o 3.3.2 Wipe on coatings ......................................................................... 32
   • 3.4 Market drivers and trends ................................................................. 33
   • 3.5 Global market size and opportunity to 2030 ....................................... 35
     o 3.5.1 End user market for nanocoatings .............................................. 35
     o 3.5.2 Global revenues for nanocoatings 2010-2030 .......................... 38
     o 3.5.3 Global revenues for nanocoatings, by market .............................. 39
       ▪ 3.5.3.1 The market in 2018 ................................................................. 39
       ▪ 3.5.3.2 The market in 2019 ................................................................. 42
       ▪ 3.5.3.3 The market in 2030 ................................................................. 44
     o 3.5.4 Global revenues by nanocoatings, by type .................................. 45
     o 3.5.5 Regional demand for nanocoatings ............................................ 50
     o 3.5.6 Demand for antimicrobial and anti-viral nanocoatings post COVID-19 pandemic ....... 52
   • 3.6 Market and technical challenges ...................................................... 54

4 NANOCOATINGS TECHNICAL ANALYSIS .................................................. 56
   • 4.1 Properties of nanocoatings ................................................................. 56
   • 4.2 Benefits of using nanocoatings ......................................................... 57
     o 4.2.1 Types of nanocoatings ................................................................. 58
   • 4.3 Production and synthesis methods ...................................................... 58
   • 4.4 Hydrophobic coatings and surfaces .................................................... 70
     o 4.4.1 Hydrophilic coatings ................................................................. 70
   • 4.4.2 Hydrophobic coatings ................................................................. 70
     o 4.4.2.1 Properties .............................................................................. 71
     o 4.4.2.2 Application in facemasks ....................................................... 71
   • 4.5 Superhydrophobic coatings and surfaces ........................................... 72
     o 4.5.1 Properties .............................................................................. 72
       ▪ 4.5.1.1 Antibacterial use ................................................................. 73
   • 4.6 Oleophobic and omniphobic coatings and surfaces ........................... 75

5 NANOMATERIALS USED IN ANTIMICROBIAL, ANTIVIRAL AND ANTIFUNGAL NANOCOATINGS ......................... 78
   • 5.1 GRAPHENE ...................................................................................... 80
     o 5.1.1 Properties ................................................................................ 80
5.2 SILICON DIOXIDE/SILICA NANOPARTICLES........................................... 85
   o 5.2.1 Properties........................................................................... 85
   o 5.2.2 Antimicrobial and antiviral activity................................... 86
   o 5.2.3 Easy-clean and dirt repellent............................................. 87
5.3 NANOSILVER.................................................................................. 87
   o 5.3.1 Properties........................................................................... 87
   o 5.3.2 Antimicrobial and antiviral activity................................... 87
   o 5.3.3 Markets and applications.................................................. 88
      ▪ 5.3.3.1 Textiles........................................................................ 89
      ▪ 5.3.3.2 Wound dressings.......................................................... 89
      ▪ 5.3.3.3 Consumer products...................................................... 89
      ▪ 5.3.3.4 Air filtration................................................................. 89
   o 5.3.4 Commercial activity.......................................................... 89
5.4 TITANIUM DIOXIDE NANOPARTICLES........................................... 90
   o 5.4.1 Properties.......................................................................... 90
   o 5.4.2 Exterior and construction glass coatings............................ 92
   o 5.4.3 Outdoor air pollution.......................................................... 93
   o 5.4.4 Interior coatings................................................................. 94
   o 5.4.5 Improving indoor air quality................................................. 94
   o 5.4.6 Medical facilities............................................................... 95
   o 5.4.7 Wastewater Treatment....................................................... 95
   o 5.4.8 Antimicrobial coating indoor light activation ....................... 96
5.5 ZINC OXIDE NANOPARTICLES...................................................... 97
   o 5.5.1 Properties........................................................................... 97
   o 5.5.2 Antimicrobial activity......................................................... 98
5.6 NANOCEULLOSE (CELLULOSE NANOFIBERS AND CELLULOSE NANOCRYSTALS).............. 100
   o 5.6.1 Properties.......................................................................... 100
   o 5.6.2 Antimicrobial activity......................................................... 101
      ▪ 5.6.2.1 Cellulose nanofibers...................................................... 101
      ▪ 5.6.2.2 Cellulose nanocrystals (CNC).......................................... 101
5.7 CARBON NANOTUBES...................................................................... 102
   o 5.7.1 Properties.......................................................................... 102
   o 5.7.2 Antimicrobial activity......................................................... 102
5.8 FULLERENES.................................................................................. 103
   o 5.8.1 Properties.......................................................................... 103
   o 5.8.2 Antimicrobial activity......................................................... 103
5.9 CHITOSAN NANOPARTICLES.......................................................... 104
   o 5.9.1 Properties.......................................................................... 104
   o 5.9.2 Wound dressings................................................................. 106
   o 5.9.3 Packaging coatings and films............................................. 106
   o 5.9.4 Food storage....................................................................... 106
5.10 COPPER NANOPARTICLES............................................................ 107
   o 5.10.1 Properties.......................................................................... 107
   o 5.10.2 Application in antimicrobial nanocoatings....................... 107
6 NANOCOATINGS MARKET STRUCTURE............................................. 108
7 MARKET ANALYSIS..............................................................110

- 7.1 ANTI-MICROBIAL AND ANTIVIRAL NANOCOATINGS.............. 111
  o 7.1.1 Market drivers and trends........................................... 113
  o 7.1.2 Applications............................................................... 118
  o 7.1.3 Global market size.................................................. 119
    • 7.1.3.1 Nanocoatings opportunity................................. 120
    • 7.1.3.2 Global revenues 2010-2030................................. 121
    • 7.1.3.3 Adjusted for COVID-19 market growth scenarios...... 123
  o 7.1.4 Companies............................................................. 123

- 7.2 ANTI-FOULING AND EASY-TO-CLEAN NANOCOATINGS........... 126
  o 7.2.1 Market drivers and trends........................................ 127
  o 7.2.2 Benefits of anti-fouling and easy-to-clean nanocoatings.... 128
  o 7.2.3 Applications............................................................... 128
  o 7.2.4 Global market size.................................................. 128
    • 7.2.4.1 Nanocoatings opportunity................................. 128
    • 7.2.4.2 Global revenues 2010-2030................................. 130
    • 7.2.4.3 Adjusted for COVID-19 market growth scenarios...... 132
  o 7.2.5 Companies............................................................. 133

- 7.3 SELF-CLEANING (BIONIC) NANOCOATINGS......................... 135
  o 7.3.1 Market drivers and trends........................................ 136
  o 7.3.2 Benefits of self-cleaning nanocoatings........................ 136
  o 7.3.3 Global market size.................................................. 137
    • 7.3.3.1 Nanocoatings opportunity................................. 138
    • 7.3.3.2 Global revenues 2010-2030................................. 140
    • 7.3.3.3 Adjusted for COVID-19 market growth scenarios...... 142
  o 7.3.4 Companies............................................................. 142

- 7.4 SELF-CLEANING (PHOTOCATALYTIC) NANOCOATINGS............. 144
  o 7.4.1 Market drivers and trends........................................ 145
  o 7.4.2 Benefits of photocatalytic self-cleaning nanocoatings....... 145
  o 7.4.3 Applications............................................................... 146
    • 7.4.3.1 Self-Cleaning Coatings..................................... 146
    • 7.4.3.2 Indoor Air Pollution and Sick Building Syndrome..... 146
    • 7.4.3.3 Outdoor Air Pollution........................................ 146
    • 7.4.3.4 Water Treatment............................................... 147
  o 7.4.4 Global market size.................................................. 147
    • 7.4.4.1 Nanocoatings opportunity................................. 147
    • 7.4.4.2 Global revenues 2010-2030................................. 150
    • 7.4.4.3 Adjusted for COVID-19 market growth scenarios...... 152
  o 7.4.5 Companies............................................................. 152

8 MARKET SEGMENT ANALYSIS, BY END USER MARKET........ 155

- 8.1 CONSTRUCTION............................................................ 156
  o 8.1.1 Market drivers and trends....................................... 156
  o 8.1.2 Applications............................................................ 157
    • 8.1.2.1 Protective coatings for glass, concrete and other construction materials.... 158
    • 8.1.2.2 Photocatalytic nano-TiO2 coatings.......................... 158
    • 8.1.2.3 Anti-graffiti....................................................... 160
    • 8.1.2.4 UV-protection.................................................... 160
    • 8.1.2.5 Titanium dioxide nanoparticles............................ 160

© Future Markets, Inc. 2020
8.1.2.6 Zinc oxide nanoparticles................................................................................. 161
8.1.3 Global market size............................................................................................. 161
  8.1.3.1 Nanocoatings opportunity.............................................................................. 161
  8.1.3.2 Global revenues 2010-2030.......................................................................... 163
8.1.4 Companies........................................................................................................ 164

8.2 HOUSEHOLD CARE, SANITARY AND INDOOR AIR QUALITY................................ 169
  8.2.1 Market drivers and trends............................................................................... 169
  8.2.2 Applications..................................................................................................... 169
    8.2.2.1 Self-cleaning and easy-to-clean............................................................... 169
    8.2.2.2 Food preparation and processing.......................................................... 169
    8.2.2.3 Indoor pollutants and air quality......................................................... 170
  8.2.3 Global market size.......................................................................................... 171
    8.2.3.1 Nanocoatings opportunity................................................................. 171
    8.2.3.2 Global revenues 2010-2030............................................................... 172
8.2.4 Companies........................................................................................................ 174

8.3 MEDICAL & HEALTHCARE............................................................................. 177
  8.3.1 Market drivers and trends............................................................................... 177
  8.3.2 Applications..................................................................................................... 178
    8.3.2.1 Anti-fouling............................................................................................. 179
    8.3.2.2 Anti-microbial and infection control.................................................... 179
    8.3.2.3 Nanosilver.............................................................................................. 179
    8.3.2.4 Medical device coatings......................................................................... 180
  8.3.3 Global market size.......................................................................................... 182
    8.3.3.1 Nanocoatings opportunity................................................................. 182
    8.3.3.2 Global revenues 2010-2030............................................................... 183
8.3.4 Companies........................................................................................................ 184

8.4 TEXTILES AND APPAREL............................................................................. 188
  8.4.1 Market drivers and trends............................................................................... 188
  8.4.2 Applications..................................................................................................... 189
  8.4.2.1 Protective textiles...................................................................................... 189
  8.4.3 Global market size.......................................................................................... 194
    8.4.3.1 Nanocoatings opportunity................................................................. 194
    8.4.3.2 Global market revenues 2010-2030..................................................... 196
8.4.4 Companies........................................................................................................ 198

8.5 PACKAGING.................................................................................................... 201
  8.5.1 Market drivers and trends............................................................................... 201
  8.5.2 Applications..................................................................................................... 201
    8.5.2.1 Antimicrobial coatings and films in food packaging.............................. 202
  8.5.3 Global market size.......................................................................................... 203
    8.5.3.1 Nanocoatings opportunity................................................................. 203
    8.5.3.2 Global revenues 2010-2030............................................................... 204
8.5.4 Companies........................................................................................................ 205

9 ANTIMICROBIAL, ANTVIRAL AND ANTIFUNGAL NANO COATINGS COMPANIES...... 207

10 RECENT RESEARCH IN ACADEMIA............................................................. 289
