Table of contents

1 EXECUTIVE SUMMARY 18
1.1 The market for conductive inks 18
1.1.1 Types of Conductive Inks 18
1.1.2 Main Applications of Conductive Inks 19
1.1.3 Advantages of Conductive Inks 19
1.1.4 Growth and development of conductive inks market 20
1.1.4.1 Market Evolution 20
1.1.5 Opportunities in Conductive Inks 21
1.1.5.1 Flexible and Wearable Electronics 22
1.1.5.2 Smart Packaging 22
1.1.5.3 Automotive Industry 23
1.1.5.4 Medical Devices 24
1.1.5.5 Energy Harvesting and Storage 24
1.1.5.6 Smart Textiles 25
1.1.5.7 Aerospace and Defence 26
1.2 Digitization of industry 26
1.3 Printing processes and equipment 27
1.4 Costs 28
1.4.1 Reducing costs 28
1.4.2 Material prices 28
1.5 Market segmentation 29
1.5.1 Materials 29
1.5.2 Printing Technology 30
1.5.3 Application 31
1.5.4 End-Use Industries 32
1.6 Global conductive ink revenues, by ink type 32

2 INTRODUCTION 34
2.1 Conductivity requirements 34
2.1.1 Challenges 35
2.1.2 Converting conductivity to sheet resistance 35
2.2 Growth in printed electronics 36
2.2.1 Antennas 36
2.2.2 EMI Shielding 37
2.3 Conductive Ink Suppliers 37
2.3.1 Market positioning 37
2.3.2 Suppliers by Conductive Material 38
2.3.2.1 Silver Inks 39
2.3.2.2 Copper Inks 39
2.3.2.3 Carbon/Graphene Inks 39
2.3.2.4 Conductive Polymers 40
2.3.3 Suppliers by Ink Composition 40
2.3.3.1 Nanoparticle Inks 40

© Future Markets, Inc 2024. All rights reserved.

2.3.3.2 Particle-free Inks 40
2.3.3.3 Hybrid Inks 41

3 CONDUCTIVE INK MATERIALS AND TECHNOLOGY 42
3.1 Overview 42
3.2 Flake-based silver inks 43
3.2.1 Overview 43
3.2.1.1 Increased conductivity and improved durability 43
3.2.1.2 High resolution functional screen printing 43
3.2.1.3 Silver electromigration 44
3.2.2 Flake-based silver ink value chain 44
3.2.3 Comparison of flake-based silver inks 45
3.2.4 Silver flake producers 46
3.2.5 SWOT analysis 47
3.3 Nanoparticle-based silver inks 48
3.3.1 Overview 48
3.3.2 Costs 49
3.3.3 Increasing conductivity 49
3.3.4 Laser-Generated Inks 50
3.3.4.1 Key advantages 50
3.3.5 Prices 51
3.3.6 Ag nanoparticle inks curing 52
3.3.6.1 Curing Temperature 52
3.3.6.2 Curing Time 52
3.3.7 Silver nanoparticle production 53
3.3.7.1 Methods 53
3.3.7.2 Benchmarking 54
3.3.7.3 Nanoparticle ink manufacturers 55
3.3.8 Applications 55
3.3.9 Comparison of nanoparticle-based silver ink types 56
3.3.10 SWOT analysis 58
3.4 Particle-free inks 59
3.4.1 Overview 59
3.4.1.1 Operating principle 60
3.4.1.2 Conductivity 60
3.4.1.3 Benefits of particle-free inks 61
3.4.1.4 Permeability 61
3.4.1.5 Thermoformable particle-free inks 62
3.4.1.6 Particle-free conductive inks based on sintering requirements 63
3.4.1.7 Particle-free inks for different metals 64
3.4.1.8 Properties of particle-free silver inks 65
3.4.2 Applications 66
3.4.2.1 Key application areas 66
3.4.2.2 EMI shielding 67
3.4.3 Particle free ink producers 67
3.4.4 SWOT analysis 68
3.5 Copper inks 69

© Future Markets, Inc 2024. All rights reserved.

3.5.1 Overview 69
3.5.1.1 Challenges 69
3.5.1.1.1 Copper oxidation 70
3.5.2 Sintering 72
3.5.3 Applications 73
3.5.3.1 Flexible and hybrid electronics (FHE) 73
3.5.3.2 RFID 74
3.5.4 Copper ink suppliers 75
3.5.5 SWOT analysis 75
3.6 Carbon-based inks (including graphene & CNTs) 77
3.6.1 Overview 77
3.6.2 Carbon Nanotube (CNT) Inks 77
3.6.2.1 Transparent conductive CNT inks 78
3.6.3 Graphene Inks 79
3.6.3.1.1 Properties 79
3.6.4 Graphene/CNT ink producers 80
3.6.5 Comparative analysis 81
3.6.6 Carbon Black Inks 82
3.6.6.1 Applications 84
3.6.7 SWOT analysis 85
3.7 Stretchable/Thermoformable Inks 87
3.7.1 Overview 87
3.7.1.1 Stretchable v Thermoformable conductive inks 87
3.7.1.2 Size and morphology of conductive filler particles 88
3.7.2 Applications and innovations 89
3.7.3 Metal gels 90
3.7.3.1 Description 91
3.7.3.2 Advantages 91
3.7.4 Stretchable/thermoformable ink manufacturers 92
3.7.5 SWOT analysis 93
3.8 Silver Nanowires 93
3.8.1 Overview 94
3.8.1.1 Benefits of silver nanowire TCFs 94
3.8.1.2 Performance in TCFs 95
3.8.1.3 Durability and flexibility 96
3.8.2 Improving electrical and mechanical properties 96
3.8.3 Coating and encapsulation 97
3.8.4 Limitations and challenges 98
3.8.5 Value chain 99
3.8.6 Manufacturing processes 99
3.8.7 Applications 100
3.8.7.1 Capacitive touch sensors 100
3.8.7.2 Touchscreens 101
3.8.7.3 Transparent heaters 102
3.8.8 Silver nanowire producers 103
3.8.9 SWOT Analysis 103

© Future Markets, Inc 2024. All rights reserved.

3.9 Conductive polymers 104
3.9.1 Overview 104
3.9.1.1 Commercial types 104
3.9.1.1.1 n-type conductive polymers 104
3.9.1.1.2 Biobased conductive polymer inks 105
3.9.1.2 Advantages 106
3.9.2 Applications 106
3.9.2.1 Flexible devices 107
3.9.2.2 Capacitive touch sensors 108
3.9.3 SWOT analysis 109

4 MARKET AND APPLICATIONS FOR CONDUCTIVE INKS 111
4.1 Overview of key applications for conductive inks 111
4.2 Benchmarking conductive ink requirements 111
4.2.1 Technological and commercial readiness of key conductive ink applications 112
4.3 Photovoltaics 113
4.3.1 Technology overview 113
4.3.1.1 Charge extraction 113
4.3.1.2 Conductive pastes and inks in photovoltaic cells 114
4.3.2 Costs 115
4.3.3 Transitioning from PERC to TOPCon and SHJ 116
4.3.4 Alternative solar cell connection technology 116
4.3.5 Conductive ink requirements 117
4.3.6 SWOT analysis 118
4.3.7 Global market revenues, by ink type 119
4.4 Printed Heaters 122
4.4.1 Technology overview 122
4.4.2 Applications 122
4.4.2.1 Automotive 122
4.4.2.2 Building-integrated solutions 124
4.4.2.3 Wearable heaters 124
4.4.3 Comparison for e-textile heating technologies 125
4.4.3.1 Heated clothing 126
4.4.4 Conductive ink requirements for printed heaters 126
4.4.5 SWOT analysis 127
4.4.6 Global market revenues, by ink type 129
4.5 Flexible hybrid electronics (FHE) 130
4.5.1 Technology overview 130
4.5.2 Advantages 131
4.5.3 FHE value chain 132
4.5.4 Applications 132
4.5.4.1 Wearable skin patches 132
4.5.4.2 Condition monitoring 133
4.5.4.3 Multi-sensor wireless asset tracking systems 134
4.5.5 Conductive ink requirements 135
4.5.6 SWOT analysis 136
4.5.7 Global market revenues, by ink type 137

© Future Markets, Inc 2024. All rights reserved.

4.6 In-mold electronics (IME) 139
4.6.1 Technology overview 139
4.6.1.1 Advantages 139
4.6.1.2 IME manufacturing 141
4.6.1.3 Materials 142
4.6.2 IME value chain 143
4.6.3 Silver flake-based ink 144
4.6.4 Conductive ink requirements 144
4.6.5 SWOT analysis 145
4.6.6 Global market revenues, by ink type 146
4.7 3D Electronics 148
4.7.1 Technology overview 148
4.7.2 Partially versus fully additive electronics 149
4.7.2.1 Partially Additive Electronics 150
4.7.2.2 Fully Additive Electronics 150
4.7.3 Nanoscale to macroscale 152
4.7.4 Fully 3D Printed Electronics 153
4.7.4.1 Fully 3D printed circuits and electronic components 154
4.7.4.2 Challenges 154
4.7.5 Conductive Ink Requirements 155
4.7.6 SWOT analysis 157
4.7.7 Global market revenues, by ink type 158
4.8 E-textiles 160
4.8.1 Technology overview 160
4.8.1.1 Integration of electronics into 160
4.8.1.2 Challenges for E-Textiles 161
4.8.2 Applications 162
4.8.2.1 Biometric Monitoring 162
4.8.2.2 Textile sensors 162
4.8.3 Conductive Ink Requirements 164
4.8.4 SWOT analysis 164
4.8.5 Global market revenues, by ink type 165
4.9 Circuit prototyping 167
4.9.1 Technology overview 167
4.9.1.1 PCB prototyping 167
4.9.1.2 Circuit prototyping and 3D electronics 167
4.9.2 Conductive ink requirements 167
4.9.3 SWOT analysis 168
4.9.4 Global market revenues, by ink type 169
4.10 Printed and flexible sensors 171
4.10.1 Key markets for printed/flexible sensors 171
4.10.2 Capacitive sensing 172
4.10.2.1 Working principle 172
4.10.2.2 Printed capacitive sensor technologies 173
4.10.2.3 3D Capacitive Sensing 173
4.10.2.4 Current mode sensor readout 174

© Future Markets, Inc 2024. All rights reserved.

4.10.2.5 Conductive ink requirements 175
4.10.2.6 SWOT analysis 176
4.10.2.7 Global market revenues, by ink type 177
4.10.3 Pressure sensors 178
4.10.3.1 Force sensitive inks 179
4.10.3.2 Manufacturing methods 179
4.10.3.2.1 Roll-to-roll manufacturing technology 180
4.10.3.3 Conductive ink requirements 180
4.10.3.4 SWOT analysis 181
4.10.3.5 Global market revenues, by ink type 183
4.10.4 Biosensors 185
4.10.4.1 Electrochemical biosensors 185
4.10.4.1.1 Fabrication of electrochemical biosensors 185
4.10.4.1.1.1 Screen Printing 185
4.10.4.1.1.2 Sputtering 185
4.10.4.1.2 Challenges 186
4.10.4.2 Printed pH sensors 187
4.10.4.3 Conductive ink requirements 188
4.10.4.4 SWOT analysis 189
4.10.4.5 Global market revenues, by ink type 190
4.10.5 Strain sensors 192
4.10.5.1 Overview 192
4.10.5.2 Capacitive strain sensors 192
4.10.5.3 Resistive strain sensors 192
4.10.5.4 AR/VR 193
4.10.5.5 Conductive ink requirements 194
4.10.5.6 SWOT analysis 195
4.10.5.7 Global market revenues, by ink type 196
4.11 Wearable electrodes 198
4.11.1 Technology overview 198
4.11.1.1 Wet vs dry electrodes 198
4.11.2 Requirements 199
4.11.3 Applications 199
4.11.3.1 Skin patches 200
4.11.3.2 E-textiles 201
4.11.4 Conductive ink requirements 203
4.11.5 SWOT analysis 204
4.11.6 Global market revenues, by ink type 205
4.12 EMI Shielding 207
4.12.1 Technology overview 207
4.12.2 Process flow 208
4.12.3 Sprayed EMI shielding 208
4.12.4 Conformal shielding technologies 209
4.12.5 Hybrid inks 210
4.12.6 Particle-free Ag ink 211
4.12.7 Heterogeneous integration 212

4.12.8 Suppliers 213
4.12.9 Conductive ink requirements 213
4.12.10 SWOT analysis 215
4.12.11 Global market revenues, by ink type 216
4.13 Printed Antennas 218
4.13.1 Technology overview 218
4.13.1.1 Extruded conductive paste 218
4.13.2 Applications 218
4.13.2.1 Automotive transparent antennas 219
4.13.2.2 Building integrated transparent antennas 219
4.13.2.3 Consumer electronic devices 220
4.13.2.4 Smart packaging 220
4.13.3 Conductive ink requirements 221
4.13.4 SWOT analysis 222
4.13.5 Global market revenues, by ink type 223
4.14 RFID & Smart Packaging 224
4.14.1 Technology overview 224
4.14.2 Applications 225
4.14.2.1 Printed RFID antennas 225
4.14.2.2 Smart packaging 225
4.14.2.3 Sensor-less sensing 226
4.14.3 Conductive ink requirements 227
4.14.4 SWOT analysis 228
4.14.5 Global market revenues, by ink type 229
4.15 Printed batteries 231
4.15.1 Technology overview 231
4.15.2 Applications 231
4.15.3 SWOT analysis 232
4.15.4 Global market revenues, by ink type 233
