Table of contents

1 EXECUTIVE SUMMARY 19
1.1 From 1G to 6G 21
1.2 Evolution from 5G Networks 25
1.2.1 Limitations with 5G 27
1.2.2 Benefits of 6G 28
1.2.3 Advanced materials in 6G 31
1.2.4 Recent hardware developments 33
1.3 The 6G Market in 2024 35
1.4 Market outlook for 6G 37
1.4.1 Proliferation in Consumer Technology 37
1.4.2 Industrial and Enterprise Transformation 38
1.4.3 Economic Competitiveness 39
1.4.4 Sustainability 40
1.5 Market drivers and trends 41
1.6 Market challenges and bottlenecks 43
1.7 Applications 46
1.7.1 Connected Autonomous Vehicle Systems 46
1.7.2 Next Generation Industrial Automation 47
1.7.3 Healthcare Solutions 48
1.7.4 Immersive Extended Reality Experiences 49
1.8 Key geographical markets for 6G 50
1.8.1 North America 50
1.8.2 Asia Pacific 51
1.8.3 Europe 53
1.9 Main market players 55
1.10 6G projects, by country 58
1.11 Global 6G government initiatives 60
1.12 6G hardware roadmap 62
1.13 SWOT analysis 65
1.14 Sustainability in 6G 67
2 INTRODUCTION 68
2.1 6G spectrum 68
2.2 Applications of 6G 72
2.3 6G devices and infrastructure 73
2.4 6G services 75
2.5 6G base stations 76
2.6 Satellite networks for 6G 78
2.7 6G drones 80

2.8 Wireless powered IoE for 6G 82
2.9 Key technologies for THz communication 84
2.10 6G networks 87
2.10.1 SAGIN - Space-air-ground integrated networks 87
2.10.2 Underwater 88
2.10.3 Key Technologies 90
2.10.4 AI-powered 6G networks 90
2.11 Global architecture concepts for 6G networks 91
2.11.1 Cell-Free Massive MIMO 92
2.11.2 Integrated Space and Terrestrial Networks 93
2.11.3 AI-Defined Networking 95
2.11.4 Energy Harvesting Grids 96
2.11.5 Visible Light Communication 97
2.11.6 Quantum Backbones 99
2.11.7 Internet of Bio-Nano Things 99
2.11.8 Terahertz Mesh Networks 101
2.11.9 AI-Optimized Topologies 101
2.11.10 THz wireless 102
2.11.11 Holographic beamforming 104
2.11.12 Intelligent reflecting surfaces 106
2.11.13 TeraHertz amplification 108
2.11.14 Visible light sensing 108
2.11.15 Quantum communication 109
2.11.16 Bio-computing networks 110
2.11.17 Blockchain 111
2.12 6G Radio system 113
2.12.1 Overview 113
2.12.1.1 Millimeter-wave (mmWave) communications 114
2.12.1.2 THz communications 115
2.12.1.3 Optical wireless communications 116
2.12.1.3.1 Visible light communication (VLC) 116
2.12.1.3.2 Light-Fidelity (LiFi) 117
2.12.1.3.3 Optical camera communication (OCC) 118
2.12.1.3.4 LiDAR technology 118
2.12.1.3.5 Free space optical (FSO) communication 120
2.12.2 Bandwidth and Modulation 120
2.12.3 Power consumption 122
2.13 6G Non-terrestrial networks 124
2.13.1 Overview 124
2.13.2 Commercial activities 126
2.14 Internet of things (IoT) 127
2.14.1 Smart cities 129

2.14.2 Smart radio environments....131
2.14.3 Smart healthcare....133
2.14.4 Smart grid....136
2.14.5 Smart transportation....138
2.14.6 Smart factories....139
2.14.7 Smart farming....141
2.15 Edge computing....142
2.16 Artificial intelligence and machine learning....145

3 MATERIALS AND TECHNOLOGIES....147
3.1 Phase array antennas....148
3.1.1 Overview....148
3.1.2 Antenna types....150
3.2 Phase array modules....152
3.2.1 Overview....152
3.2.2 Commercial and proof-of-concepts....153
3.3 Packaging technologies....155
3.3.1 Overview....155
3.3.2 Antenna packages....157
3.4 Inorganic compounds....159
3.4.1 Overview....159
3.4.2 Materials....160
3.5 Elements....162
3.5.1 Overview....162
3.5.2 Materials....164
3.6 Organic compounds....166
3.6.1 Overview....166
3.6.2 Materials....167
3.7 Semiconductor technologies for 6G....170
3.7.1 CMOS....171
3.7.1.1 CMOS technology - Bulk vs SOI....172
3.7.1.2 RF CMOS technology....172
3.7.1.3 CMOS and hybrid III-V+CMOS approaches sub-THz....173
3.7.1.4 6G CMOS design....175
3.7.1.5 PD-SOI CMOS and SiGe BiCMOS for 6G....176
3.7.2 SiGe....177
3.7.2.1 RF SiGe technology....179
3.7.3 GaAs and GaN....179
3.7.4 InP....181
3.7.5 Si vs III-V semiconductors....183
3.7.5.1 Key Differences....183
3.7.6 Semiconductor technology choices for THz RF....184

3.7.7 Key THz Technologies 186
3.7.8 Challenges 188
3.8 Reconfigurable intelligent surfaces (RIS) 188
3.8.1 6G Reconfigurable intelligent surfaces and metamaterials 188
3.8.2 Overview 191
3.8.3 Applications in 6G 193
3.8.4 Transparent IRS and RIS 194
3.8.5 Simultaneous transmissive and reflective STAR RIS 195
3.8.6 Semi-passive and active RIS materials and components 197
3.8.7 Hardware 199
3.8.8 Metamaterials and Metasurfaces 203
3.8.9 Liquid crystal polymers (LCP) for RIS 204
3.8.10 Beam management 205
3.8.11 Companies 207
3.8.12 SWOT analysis 209
3.9 Metamaterials 211
3.9.1 Overview 212
3.9.2 Applications 214
3.9.2.1 Reconfigurable antennas 215
3.9.2.2 Wireless sensing 215
3.9.2.3 Wi-Fi/Bluetooth 216
3.9.2.4 5G and 6G Metasurfaces for Wireless Communications 218
3.9.2.5 Hypersurfaces 220
3.9.2.6 Active material patterning 221
3.9.2.7 Optical ENX metamaterials 221
3.9.2.8 Metamaterials for RIS 221
3.9.2.9 Liquid crystal polymers 222
3.9.3 Companies 225
3.9.4 SWOT analysis 227
3.10 Low-loss materials 229
3.10.1 Overview 229
3.10.2 6G low-loss materials 233
3.10.3 Companies 238
3.10.4 SWOT analysis 239
3.11 6G dielectrics 241
3.11.1 Overview 241
3.11.2 Companies 246
3.11.3 SWOT analysis 248
3.12 Cell-Free Massive MIMO 248
3.12.1 Overview 248
3.12.2 Cellular mMIMO, network mMIMO, and cell-free mMIMO 250
3.13 Fiber optics 251

3.13.1 Overview 251
3.13.2 Materials and applications in 6G 252
3.14 Graphene and 2D materials 254
3.14.1 Overview 254
3.14.2 Applications 255
3.14.2.1 Supercapacitors, LiC and pseudocapacitors 255
3.14.2.2 Graphene transistors 257
3.14.2.3 Graphene THz device structures 258
3.14.3 Companies 258
3.15 Thermal management 259
3.15.1 Overview 259
3.15.2 Thermal materials and structures for 6G 261
3.15.2.1 Thermal management materials 262
3.15.2.1.1 Advanced Ceramics 262
3.15.2.1.2 Diamond-based Materials 262
3.15.2.1.3 Graphene and Carbon Nanotubes 263
3.15.2.1.4 Phase Change Materials (PCMs) 264
3.15.2.1.5 Advanced Polymers 264
3.15.2.1.6 Metal Matrix Composites 265
3.15.2.1.7 Two-Dimensional Materials 265
3.15.2.1.8 Nanofluid Coolants 266
3.15.2.1.9 Thermal metamaterials 267
3.15.2.1.10 Hydrogels 267
3.15.2.1.11 Aerogels 268
3.15.2.1.12 Ionogels 268
3.15.2.1.13 Pyrolytic graphite 269
3.15.2.2 Thermoelectrics 270
3.15.3 Companies 274
3.15.4 SWOT analysis 277
3.16 Smart EM devices 279
3.16.1 Overview 279
3.17 Photoactive materials 281
3.17.1 Overview 281
3.17.2 Applications in 6G 282
3.18 Silicon carbide 283
3.18.1 Overview 284
3.18.2 Applications in 6G 285
3.19 Phase-Change Materials 286
3.19.1 Overview 286
3.19.2 Applications in 6G 288
3.20 Vanadium dioxide 289
3.20.1 Overview 289

3.20.2 Applications in 6G....290
3.21 Micro- mechanics, MEMS and microfluidics....292
3.21.1 Overview....292
3.21.2 Applications in 6G....293
3.22 Beyond communications markets and applications....295
3.22.1 THz Sensing....295
3.22.2 THz Imaging....298
3.23 Solid state cooling....300
3.23.1 Overview....300
3.23.2 Companies....303
3.24 Zero Energy Devices....307
3.24.1 Overview....307
3.24.2 6G ZED materials and technologies....308
3.24.2.1 Metamaterials....310
3.24.2.2 IRS....311
3.24.2.3 RIS....313
3.24.2.4 Simultaneous wireless and information transfer SWIPT....313
3.24.2.5 Ambient backscatter communications AmBC....315
3.24.2.6 Energy harvesting for 6G....315
3.24.2.6.1 Photovoltaic....315
3.24.2.6.2 Ambient RF....316
3.24.2.6.3 Electrodynamic....316
3.24.2.6.4 Piezoelectric....317
3.24.2.6.5 Triboelectric....318
3.24.2.6.6 Thermoelectric....319
3.24.2.6.7 Pyroelectric....320
3.24.2.6.8 Thermal hydrovoltaic....321
3.24.2.6.9 Biofuel cells....321
3.24.2.7 Ultra-low power electronics....322
3.24.2.7.1 Supercapacitors....324
3.24.2.7.2 Hybrid approaches....325
3.24.2.7.3 Pseudocapacitors....326

4 GLOBAL MARKET FORECASTS FOR 6G, 2025-2045....326
4.1 Market revenues....327
4.2 Base stations....328
4.3 6G dielectric and thermal materials....332
4.4 Low loss material....333
4.5 Thermal materials....334
4.6 RIS tiles....335
4.6.1 Pricing forecasts....335
4.6.2 By square meter....337
