Table of contents

1 EXECUTIVE SUMMARY 21
1.1 Market snapshot 21
1.2 Market map 23
1.3 Technology Status 25
1.3.1 Current Market State of Optical Computing 25
1.3.2 Photonic Integrated Circuits (PICs) Maturity 26
1.4 Future Outlook 27
1.4.1 Short-term Projections (2025-2027) 27
1.4.2 Medium-term Outlook (2028-2031) 28
1.4.3 Long-term Vision (2032-2035) 29
2 INTRODUCTION AND KEY CONCEPTS 30
2.1 Technology Background 30
2.1.1 What is Optical Computing? 31
2.1.1.1 Historical Context 32
2.1.1.2 Basic Principles of Optical Computing 32
2.1.2 Photonics versus Electronics 33
2.1.2.1 Speed and Bandwidth Comparison 34
2.1.2.2 Energy Efficiency Considerations 35
2.1.2.3 Integration Challenges 36
2.1.3 Electronic and Photonic Integrated Circuits Compared 37
2.1.3.1 Architectural Differences 37
2.1.3.2 Performance Characteristics 38
2.1.3.3 Manufacturing Considerations 39
2.1.4 Advantages and Challenges of Optical Computing 40
2.1.4.1 Speed and Bandwidth Advantages 40
2.1.4.2 Energy Efficiency Benefits 41
2.1.4.3 Integration and Miniaturization Challenges 42
2.1.4.4 Cost Considerations 43
2.2 Photonic Integrated Circuit (PIC) Key Concepts 44
2.2.1 Optical IO, Coupling and Couplers 45
2.2.1.1 Fiber-to-Chip Coupling 46
2.2.1.2 On-Chip Optical Couplers 47
2.2.2 Emission and Photon Sources/Lasers 48
2.2.2.1 Semiconductor Lasers 49
2.2.2.2 Integration of Light Sources on PICs 50
2.2.3 Detection and Photodetectors 51
2.2.3.1 Types of Photodetectors 52
2.2.3.2 Integration Challenges for Detectors 53

© Future Markets, Inc 2024. All rights reserved.

2.2.4 Modulation and Modulators 54
2.2.4.1 Electro-optic Modulators 55
2.2.4.2 Thermo-optic Modulators 56
2.2.4.3 All-optical Modulators 57
2.2.5 Light Propagation and Waveguides 58
2.2.5.1 Waveguide Structures 58
2.2.5.2 Loss Mechanisms in Optical Waveguides 59
2.2.6 PIC Architecture 60
2.2.6.1 Monolithic Integration 61
2.2.6.2 Hybrid Integration 62
2.2.6.3 Heterogeneous Integration 63
2.3 Quantum Computing Concepts 64
2.3.1 Introduction to Quantum Computing 64
2.3.1.1 Quantum Bits (Qubits) 65
2.3.1.2 Quantum Gates and Circuits 66
2.3.2 Quantum Computing Architectures Overview 67
2.3.2.1 Superconducting Qubits 67
2.3.2.1.1 Technology description 67
2.3.2.1.2 Materials 68
2.3.2.1.3 Market players 70
2.3.2.2 Trapped Ions 72
2.3.2.2.1 Technology description 72
2.3.2.2.2 Materials 74
2.3.2.2.2.1 Integrating optical components 74
2.3.2.2.2.2 Incorporating high-quality mirrors and optical cavities 75
2.3.2.2.2.3 Engineering the vacuum packaging and encapsulation 75
2.3.2.2.2.4 Removal of waste heat 76
2.3.2.2.3 Market players 76
2.3.2.3 Photonic Qubits 78
2.3.2.3.1 Technology description 78
2.3.2.3.2 Market players 81
2.3.2.4 Neutral Atoms 83
2.3.2.4.1.1 Technology description 83
2.3.2.4.1.2 Market players 85
2.3.2.5 Topological Qubits 87
2.3.2.5.1 Technology description 87
2.3.2.5.2 Market players 88

3 MATERIALS AND MANUFACTURING 89
3.1 Optical Computing Materials 89
3.1.1 Silicon and Silicon-on-Insulator (SOI) 90
3.1.1.1 Properties and Advantages 91

© Future Markets, Inc 2024. All rights reserved.

3.1.1.2 Limitations and Challenges 92
3.1.1.3 Key Players and Developments 92
3.1.2 Silicon Nitride (SiN) 93
3.1.2.1 Optical Properties 94
3.1.2.2 Manufacturing Processes 95
3.1.2.3 Applications and Market Adoption 96
3.1.3 Indium Phosphide 96
3.1.3.1 Material Characteristics 97
3.1.3.2 Integration Challenges 98
3.1.3.3 Market Players and Products 98
3.1.4 Organic Polymer on Silicon 99
3.1.4.1 Advantages of Polymer-based PICs 100
3.1.4.2 Manufacturing Techniques 101
3.1.5 Thin Film Lithium Niobate 102
3.1.5.1 Electro-optic Properties 103
3.1.5.2 Fabrication Methods 104
3.1.5.3 Emerging Applications 105
3.1.6 Barium Titanate and Rare Earth Metals 105
3.1.6.1 Novel Properties for Optical Computing 106
3.1.6.2 Integration Challenges 107
3.1.6.3 Future Prospects 108
3.1.7 Emerging PIC materials 109
3.1.8 Metasurfaces 111
3.1.9 Neuromorphic photonics 113
3.1.10 Materials Comparison and Benchmarking 113
3.1.10.1 Performance Metrics 114
3.1.10.2 Cost Analysis 115
3.1.11 Wafer Sizes and Processing 116
3.1.11.1 Current Wafer Size Trends 117
3.1.11.2 Scaling Challenges 117
3.1.12 Integration Schemes 118
3.1.12.1 Monolithic Integration 119
3.1.12.2 Hybrid Integration 120
3.1.12.3 Heterogeneous Integration 120
3.1.13 Heterogeneous Integration Techniques 121
3.1.13.1 Wafer Bonding 122
3.1.13.2 Flip-Chip Bonding 123
3.1.13.3 Micro-Transfer Printing 123
3.1.14 The PIC Design Cycle: Multi-Project Wafers 124
3.1.14.1 Design Tools and Software 125
3.1.14.2 Fabrication Services 126
3.1.14.3 Testing and Packaging 126

© Future Markets, Inc 2024. All rights reserved.

3.2 Key Manufacturers and Foundries 127
3.2.1 Pure-Play PIC Foundries 128
3.2.2 Integrated Device Manufacturers (IDMs) 130

4 OPTICAL COMPUTING TECHNOLOGIES 132
4.1 Photonic Integrated Circuits (PICs) 132
4.1.1 PIC Architectures 132
4.1.1.1 Planar Lightwave Circuits 132
4.1.1.2 3D Integrated Photonics 133
4.1.2 Integration Schemes of PICs 134
4.1.2.1 Monolithic Integration 135
4.1.2.2 Hybrid Integration 135
4.1.2.3 Heterogeneous Integration 136
4.1.3 Operational Frequency Windows of Optical Materials 137
4.1.3.1 Visible Light PICs 138
4.1.3.2 Near-Infrared PICs 138
4.1.3.3 Mid-Infrared PICs 139
4.2 Optical Processors 140
4.2.1 Digital Optical Computing 140
4.2.1.1 All-Optical Logic Gates 141
4.2.1.2 Optical Flip-Flops and Memory 142
4.2.2 Analog Optical Computing 143
4.2.2.1 Optical Matrix Multiplication 143
4.2.2.2 Fourier Optics and Signal Processing 144
4.2.3 Neuromorphic Photonics 145
4.2.3.1 Optical Neural Networks 146
4.2.3.2 Reservoir Computing 146
4.3 Quantum Optical Computing 147
4.3.1 Photonic Platform for Quantum Computing 148
4.3.1.1 Single-Photon Sources 149
4.3.1.2 Quantum Gates and Circuits 149
4.3.1.3 Photon Detection Technologies 149
4.3.2 Comparison with Other Quantum Computing Architectures 150
4.3.2.1 Advantages of Photonic Qubits 150
4.3.2.2 Scaling Challenges 151
4.3.2.3 Error Correction in Photonic Quantum Computing 152
4.3.3 Quantum PIC Requirements and Roadmap 153
4.3.3.1 Current State of Quantum PICs 154
4.4 Optical Interconnects 156
4.4.1 On-Device Interconnects 156
4.4.1.1 Chip-to-Chip Optical Interconnects 156
4.4.1.2 On-Chip Optical Interconnects 157

© Future Markets, Inc 2024. All rights reserved.

4.4.2 Data Center Interconnects 158
4.4.2.1 Rack-to-Rack Interconnects 158
4.4.2.2 Inter-Data Center Interconnects 160
4.5 Advanced Packaging and Co-Packaged Optics 161
4.5.1 Evolution of Semiconductor Packaging 161
4.5.1.1 2D to 2.5D Packaging 161
4.5.1.1.1 Silicon Interposer 2.5D 163
4.5.1.1.1.1 Through Si Via (TSV) 163
4.5.1.1.1.2 (SiO2) based redistribution layers (RDLs) 164
4.5.1.1.2 2.5D Organic-based packaging 165
4.5.1.1.2.1 Chip-first and chip-last fan-out packaging 166
4.5.1.1.2.2 Organic substrates 168
4.5.1.1.2.3 Organic RDL 169
4.5.1.1.3 2.5D glass-based packaging 170
4.5.1.1.3.1 Benefits 171
4.5.1.1.3.2 Glass Si interposers in advanced packaging 172
4.5.1.1.3.3 Glass material properties 173
4.5.1.1.3.4 2/2 µm line/space metal pitch on glass substrates 174
4.5.1.1.3.5 3D Glass Panel Embedding (GPE) packaging 175
4.5.1.1.3.6 Thermal management 177
4.5.1.1.3.7 Polymer dielectric films 177
4.5.1.1.3.8 Challenges 178
4.5.1.1.3.9 Comparison with other substrates 179
4.5.1.1.4 2.5D vs. 3D Packaging 180
4.5.1.1.5 Benefits 180
4.5.1.1.6 Challenges 181
4.5.1.1.7 Trends 181
4.5.1.1.8 Market players 182
4.5.1.2 3D Packaging Technologies 182
4.5.1.2.1 Overview 184
4.5.1.2.1.1 Conventional 3D packaging 184
4.5.1.2.1.2 Advanced 3D Packaging with through-silicon vias (TSVs) 185
4.5.1.2.1.3 Three-dimensional (3D) hybrid bonding 186
4.5.1.2.1.4 Devices using hybrid bonding 187
4.5.1.2.2 3D Microbump technology 188
4.5.1.2.2.1 Technologies 188
4.5.1.2.2.2 Challenges 190
4.5.1.2.2.3 Bumpless copper-to-copper (Cu-Cu) hybrid bonding 190
4.5.1.2.2.4 Trends 192
4.5.2 Co-Packaged Optics (CPO) Technology 194
4.5.2.1 CPO Architectures 194
4.5.2.2 Benefits and Challenges of CPO 195

© Future Markets, Inc 2024. All rights reserved.

4.5.3 CPO Market Players and Developments 197

5 MARKETS AND APPLICATIONS 199

5.1 Data Centers and High-Performance Computing 199
5.1.1 Optical Transceivers for Data Centers 199
5.1.1.1 Current and Future Data Rates 199
5.1.1.2 Form Factors and Standards 200
5.1.2 PIC-based Transceivers for AI and Machine Learning 201
5.1.2.1 AI Accelerator Interconnects 201
5.1.2.2 High-Bandwidth Memory Interfaces 203
5.1.3 Photonic Engines and Accelerators for AI 204
5.1.3.1 Optical Matrix Multiplication Engines 204
5.1.3.2 Photonic Tensor Processing Units 205
5.2 Telecommunications 207
5.2.1 5G and Beyond 207
5.2.1.1 Fronthaul and Backhaul Networks 207
5.2.1.2 Millimeter-Wave Photonics 208
5.2.2 Optical Networking Equipment 209
5.2.2.1 Optical Switches and Routers 209
5.2.2.2 Wavelength Division Multiplexing (WDM) Systems 210
5.3 Quantum Computing and Communication 211
5.3.1 Quantum Key Distribution 211
5.3.1.1 Discrete Variable vs. Continuous Variable QKD Protocols 212
5.3.2 Quantum Sensing 214
5.3.2.1 Quantum Magnetometers 214
5.3.2.2 Quantum Gravimeters 217
5.3.2.2.1 Applications 218
5.3.2.2.2 Key players 221
5.4 Automotive and LiDAR 223
5.4.1 PIC-based LiDAR Systems 223
5.4.1.1 Coherent LiDAR 223
5.4.1.2 Flash LiDAR 224
5.4.2 Autonomous Vehicle Applications 226
5.4.2.1 Object Detection and Tracking 226
5.4.2.2 HD Mapping and Localization 228
5.5 Aerospace and Defense 229
5.5.1 Optical Gyroscopes 229
5.5.2 Free-Space Optical Communications 231
5.6 Healthcare and Biomedical 233
5.6.1 PIC-based Biosensors 233
5.6.1.1 Lab-on-a-Chip Devices 233
5.6.1.2 Point-of-Care Diagnostics 234

© Future Markets, Inc 2024. All rights reserved.

5.6.2 Medical Imaging 235
5.6.2.1 Optical Coherence Tomography (OCT) 235
5.6.2.2 Photoacoustic Imaging 236
5.7 Industrial Sensing and IoT 238
5.7.1 Gas and Chemical Sensors 238
5.7.1.1 Environmental Monitoring 239
5.7.1.2 Process Control in Manufacturing 239
5.7.1.3 Structural Health Monitoring 240
5.7.1.4 Fiber Optic Sensors for Infrastructure 240
5.7.1.5 Distributed Acoustic Sensing 240

6 MARKET ANALYSIS AND FORECASTS 242
6.1 Global Optical Computing Market Overview 242
6.1.1 Historical Market Trends 242
6.1.2 Market Size and Growth Projections (2025-2035) 243
6.1.3 Key Growth Drivers and Inhibitors 244
6.2 Market Segmentation 246
6.2.1 By Technology Type 246
6.2.1.1 Photonic Integrated Circuits 246
6.2.1.2 Optical Processors 247
6.2.1.3 Quantum Optical Computing 249
6.2.2 By Application 250
6.2.2.1 Data Centers and HPC 250
6.2.2.2 Telecommunications 251
6.2.2.3 Automotive and LiDAR 252
6.2.2.4 Healthcare and Biomedical 253
6.2.3 By Geography 254
6.2.3.1 North America 254
6.2.3.2 Europe 255
6.2.3.3 Asia-Pacific 256
6.2.3.4 Rest of the World 257
6.3 PIC Market Forecasts 259
6.3.1 PIC Market by Material Platform 259
6.3.1.1 Silicon Photonics 259
6.3.1.2 Indium Phosphide 259
6.3.1.3 Silicon Nitride 260
6.3.1.4 Others 262
6.3.2 PIC-based Transceiver Market 263
6.3.2.1 By Data Rate 263
6.3.2.2 By Application 264
6.3.3 PIC for AI and Data Centers 265
6.3.3.1 AI Accelerator Interconnects 265

© Future Markets, Inc 2024. All rights reserved.

6.3.3.2 High-Performance Computing 266
6.3.4 PIC for Telecommunications 267
6.3.4.1 5G and Beyond 267
6.3.4.2 Optical Networking Equipment 268
6.3.5 Quantum PIC Market 269
6.3.5.1 Quantum Computing 269
6.3.5.2 Quantum Communications 270
6.3.6 PIC-based Sensor and LiDAR Markets 270
6.3.6.1 Automotive LiDAR 270
6.3.6.2 Industrial Sensing 272
6.4 Optical Processor Market Forecasts 273
6.4.1 By Type (Digital, Analog, Neuromorphic) 273
6.4.2 By Application 274
6.5 Quantum Optical Computing Market Forecasts 276
6.5.1 By Type of Quantum Technology 276
6.5.2 By Application Area 276

7 TECHNOLOGY TRENDS AND FUTURE OUTLOOK 278
7.1 Emerging Technologies in Optical Computing 278
7.1.1 All-Optical Computing 278
7.1.2 Neuromorphic Photonics 279
7.1.3 Quantum Photonics 280
7.2 Integration Trends 281
7.2.1 Photonic-Electronic Integration 281
7.2.2 3D Integration for Optical Computing 282
7.3 Scalability and Manufacturability Improvements 283
7.3.1 Advanced Manufacturing Techniques 283
7.3.2 Automated Testing and Packaging 284
7.4 Advances in Quantum Optical Computing 285
7.4.1 Scalable Quantum Photonic Architectures 286
7.4.2 Quantum Error Correction in Optical Systems 287
7.5 The Role of AI in Optical Computing Design 288
7.5.1 AI-assisted PIC Design 289
7.5.2 Optimization of Optical Neural Networks 290
7.6 Roadmaps for Various Optical Computing Technologies 291
7.6.1 PIC Technology Roadmap 292
7.6.2 Optical Processor Roadmap 293
7.6.3 Quantum Optical Computing Roadmap 295

8 CHALLENGES AND OPPORTUNITES 296
8.1 Technical Challenges 296
8.1.1 Efficiency and Power Consumption 298
8.1.2 Integration and Packaging 299

© Future Markets, Inc 2024. All rights reserved.

8.1.3 Scalability and Yield 300
8.2 Market Challenges 301
8.2.1 Cost Competitiveness 302
8.2.2 Adoption Barriers 303
8.2.3 Standardization Issues 304
8.3 Opportunities 306
8.3.1 Data Center and AI/ML Acceleration 306
8.3.2 5G and 6G Communications 307
8.3.3 Quantum Technologies 308
8.3.4 Green Computing Initiatives 309
8.4 Environmental Regulations and Sustainability 310
8.4.1 Energy Efficiency Standards 310
8.4.2 Material Usage and Recycling Policies 312

9 COMPANY PROFILES 314
9.1 3E8 314
9.2 AIM Photonics 315
9.3 Akhetonics 317
9.4 AMO 318
9.5 AQT 319
9.6 Astrape Networks 320
9.7 Atom computing 320
9.8 Black Semiconductor 321
9.9 Bosch 322
